

1. WHAT IS WILD GLASS?

INTRODUCTION

PRODUCT OFFER BECOMING A BRAND

THE CHALLENGE

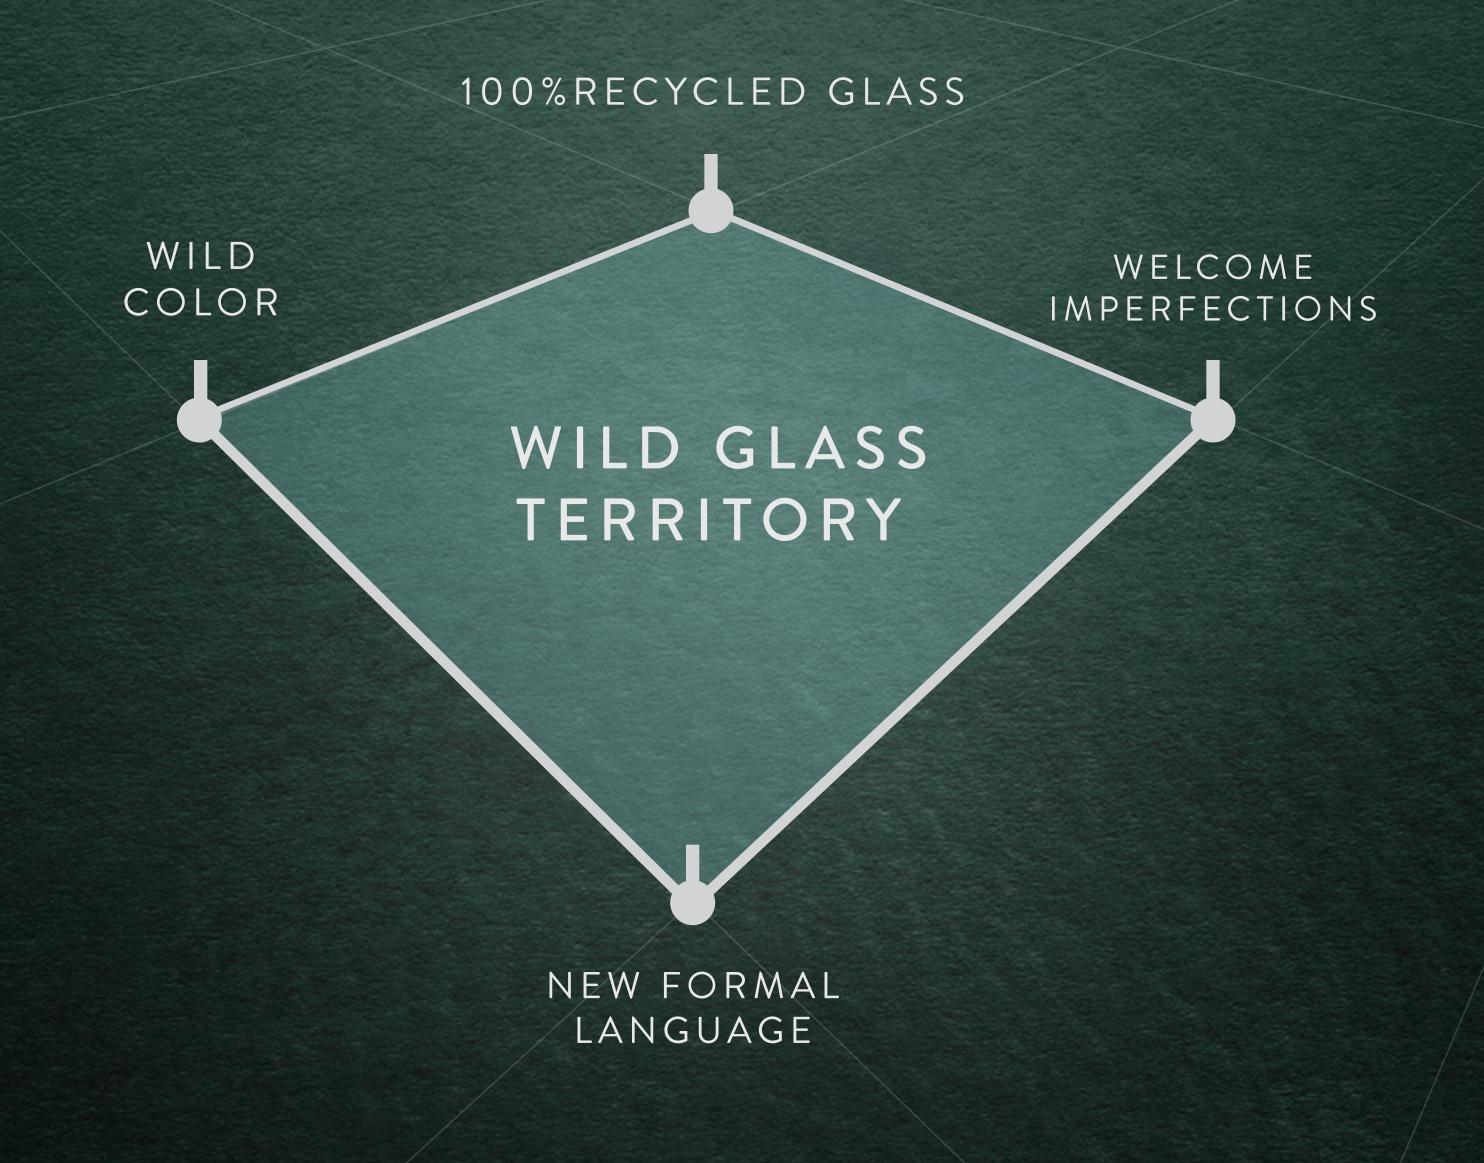

Wild Glass is a movement in which its identifying features are the cause and consequence of a more sustainable, efficient and honest production.

Wild Glass uses 100% recycled glass in the production process and accepts the defect through a unique design language which translates to a new and unique range of glass colors.

In Wild Glass the whole is greater than the sum of its parts.

DEFINING THE TERRITORY

3. RUDE DESIGN LANGUAGE

THE NEED FOR A NEW SPECIES

Welcoming color and texture imperfections in a market used to clean and crystal clear products must be done carefully.

While these imperfections in many products can be perceived by the users as defects in a bad way, in others can be perceived as authentic, unique and ultimately as a seal of quality.

The challenge is to create a design language that allows for the creation of a new bottle collection that embraces and is enhanced by the properties of Wild Glass.
